Describe Incident (how, where, why)
Dave was driving the mini excavator on the sidewalk on the south side of Plymouth Rd. He was trying to get between the 20x22 drill , crosswalk signal pole and overhead tree branches and misjudged his clearance from the crosswalk signal pole and struck the signal pole with the mini excavator arm causing the pole to fall on the ground.

Describe Extent of damage/loss
The base of the crosswalk signal pole split at two corners causing the pole to fall. DPW arrived on site and stated it just needs a new base, they left shortly after to get a new base.

Doc ID: #10669

Was avoiding drill and tree above. Thought that I had cleared where the pole was at and accidentally hit crosswalk signal pole.
